

LIMIT SWITCH BOX

VLS90 Serisi 90° Contact, 2SPDT Mechanic Switch, IP67

Product Code: VLS902M

Introduction

The VLS902M Limit Switch Box is a kind of field instrument used to detect the valve status in the automatic control system. It is used to output the open or closed position of the valve as a switching signal. The remote controller receives or samples the computer. After confirmation, the next step is performed. The product can also be used as an important valve interlock protection and remote alarm indication in the automatic control system.

VLS902M Pneumatic Limit Switch Box Features

Protection Class	: IP67
Position Indication	: Close: Red, Open: Yellow
Ambient Temperature	: -20°C-+80°C
Connection	: 2*NPT 1/2
Switch	: Mechanical Switch*2 Proximity Switch*2
Coating	: Polyester (Black)
Axis	: Standard axis (17mm)

VLS902M Pneumatic Limit Switch Box Parameter

Body case type	Protective IP67/NEMA 4&4X flameproof type
Cable interface	2NPT3/4"
Ambient temperature	-20°C-80°C
End	8heads(0.08-2.5mm)
Position indicator	0-9°(90 automatic rotation)off:red,on:yellow
Switch	Mechanich switch, proximity switch
Coating	Chromate polyester powder coating(black)
